## About This Document

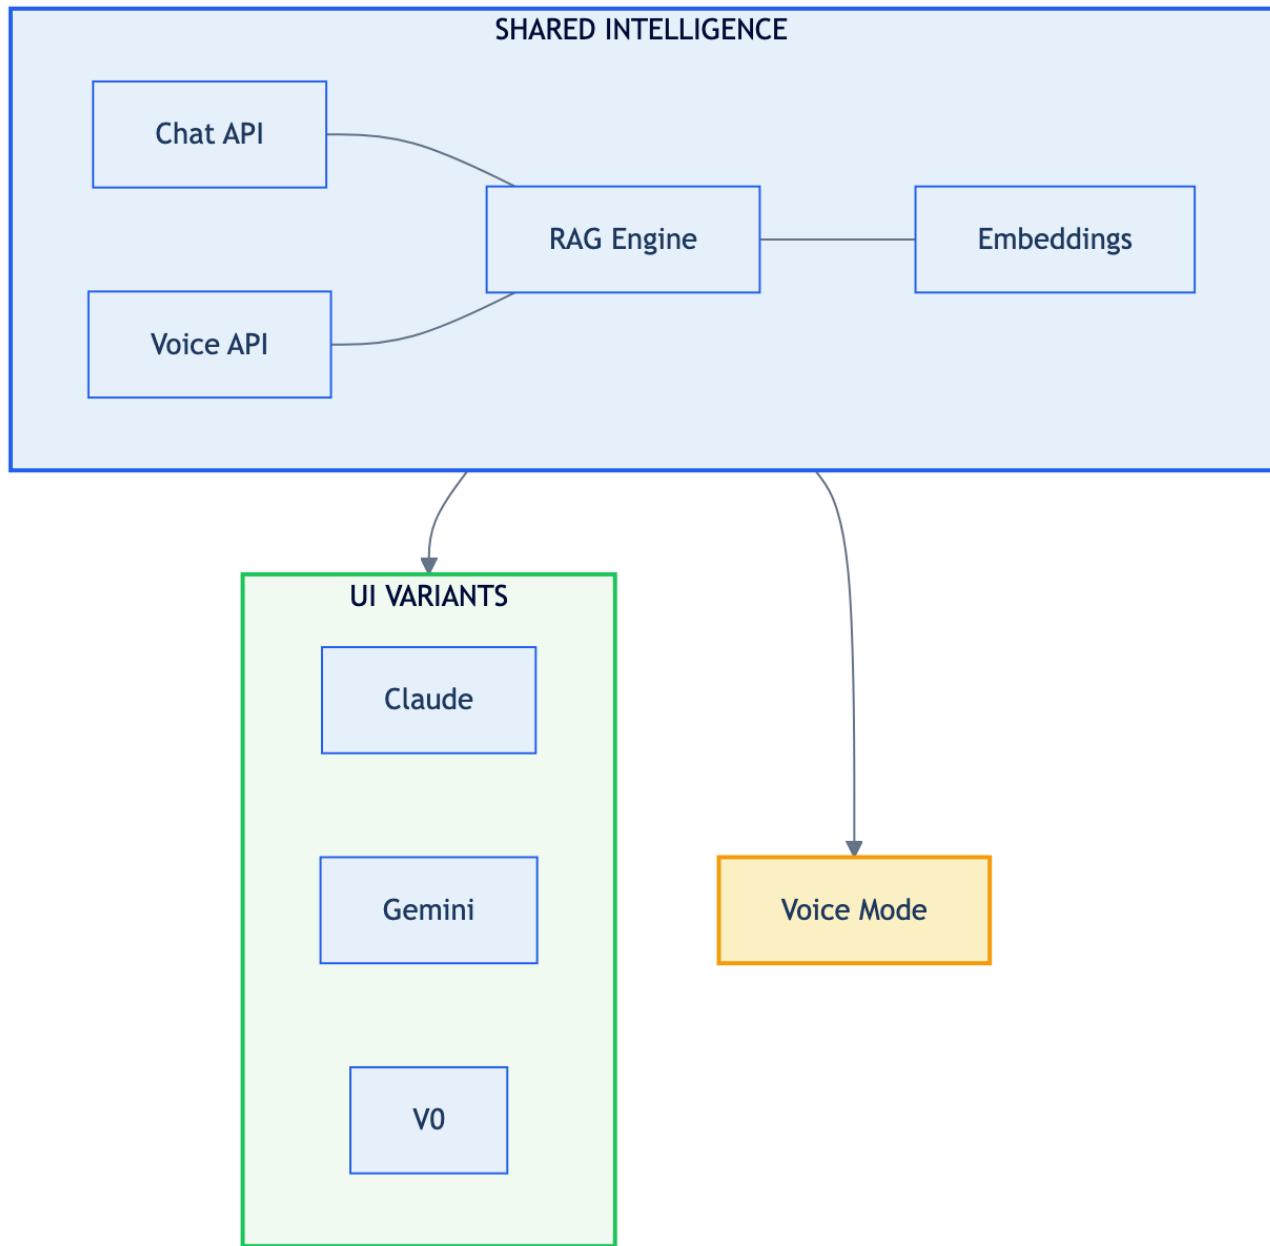

This guide explains the architecture behind My4Blocks — an AI-powered emotional education platform based on Dr. Vincent E. Parr's book "*You Only Have Four Problems*."

The system provides **three UI variants** (Claude, Gemini, V0) that share a common intelligence layer, plus a **real-time voice mode** for hands-free conversations.

# 1. Overview

---

My4Blocks provides **three UI variants** that all share the same intelligence:

**All paths lead to the same brain** — a RAG system powered by 280 chunks of wisdom from Dr. Vincent E. Parr's "*You Only Have Four Problems*."

## 2. The Knowledge Base

---

### Source Material

File	Size	Purpose
you-only-have-four-problems-book-text.pdf	706 KB	Original book
shared/data/embeddings.json	280 chunks	Processed wisdom

### Chapter Distribution

Code	Chapter	Chunks
ABC	ABCs	87
MEN	Mental Contamination	65
GEN	General	43
ANG	Anger	36
HAP	Happiness	13
IRR	Irrational Beliefs	11
HEA	Healthy Living	10
DEP	Depression	3
ANX	Anxiety	1

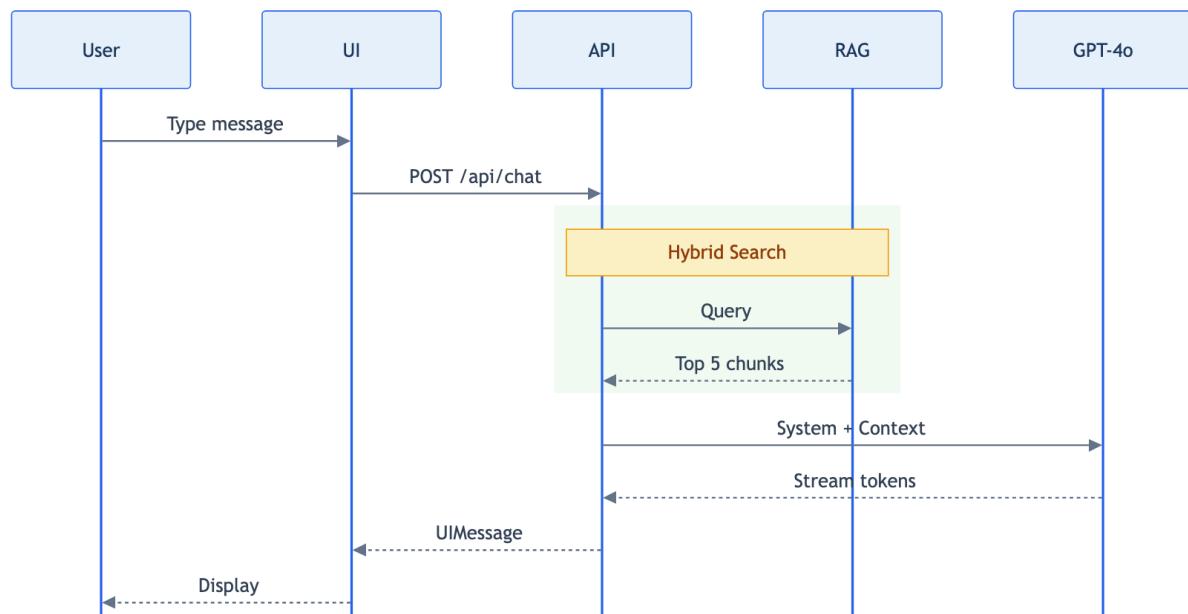

### Chunk Structure

Each of the 280 chunks contains:

- **text** — The actual wisdom content
- **embedding** — 1536-dimensional vector (OpenAI text-embedding-3-small)
- **metadata** — Chapter, section, title, tags, keywords, related chunks

### 3. How Chat Works

---

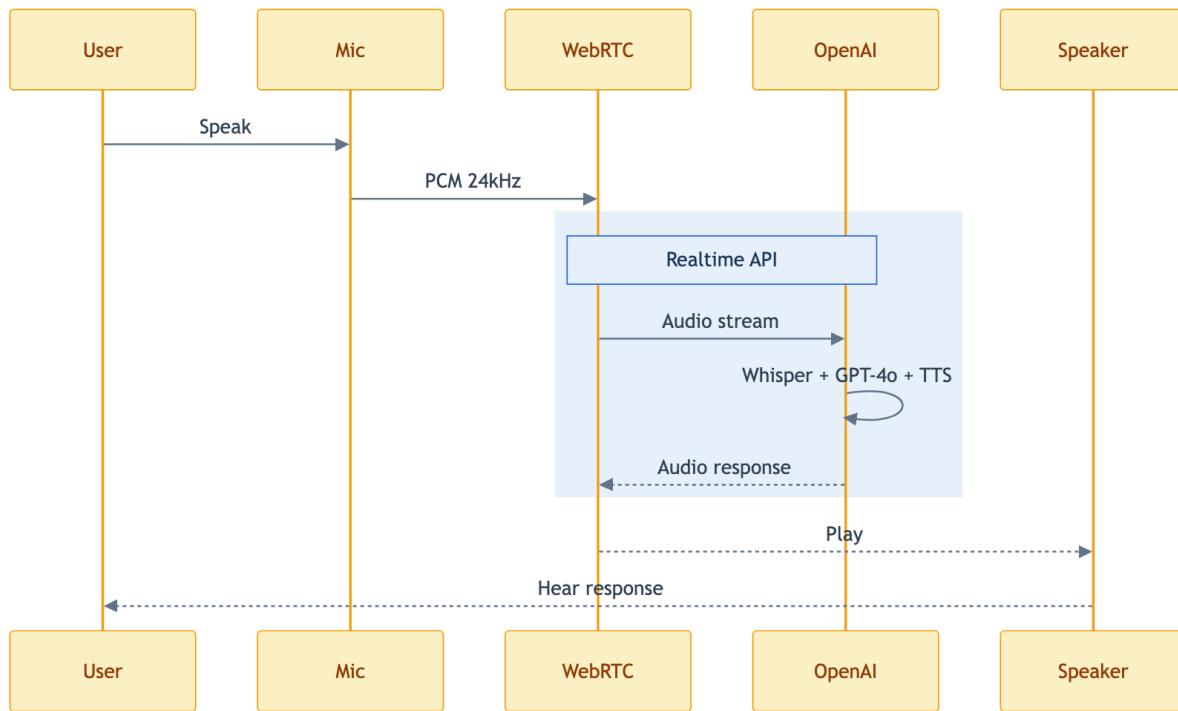

#### Flow Summary

1. **User** types a message in the UI
2. **API** receives `POST /api/chat` with message history
3. **RAG** performs hybrid search (70% semantic + 30% keyword)
4. **Top 5 chunks** are retrieved and formatted as context
5. **GPT-4o-mini** receives system prompt + RAG context + messages
6. **Tokens** stream back to the UI in real-time

**Key file:** `shared/api/chat.ts` — `handleChatRequest()`

## 4. How Voice Works

### Flow Summary

1. **User** speaks into microphone
2. **WebRTC** streams PCM audio (24kHz) to OpenAI
3. **Whisper** transcribes speech to text
4. **GPT-4o Realtime** processes with RAG-injected instructions
5. **TTS** converts response to speech
6. **Audio** streams back via WebRTC data channel

**Key file:** `shared/api/realtime.ts` — `createRealtimeSession()`

## 5. System Prompts

---

### The Four Blocks to Happiness

Block	Description	Key Thought
<b>Anger</b>	Demanding others/situations be different	<i>"This should not be happening"</i>
<b>Anxiety</b>	Catastrophizing about the future	<i>"What if the worst happens?"</i>
<b>Depression</b>	Rating your SELF as worthless	<i>"I am a failure"</i>
<b>Guilt</b>	Self-condemnation about actions	<i>"I should have done differently"</i>

### The ABC Model

Letter	Meaning
<b>A</b>	Activating Event — what happens
<b>B</b>	Belief — your thoughts about it
<b>C</b>	Consequence — your emotional response

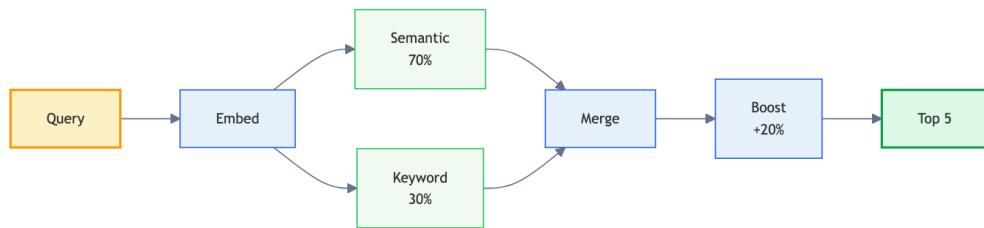

*"Events don't cause emotions; BELIEFS do!"*

### Voice Style Options

Style	Description
<b>Direct</b>	Skip filler. Give insight, then discuss.
<b>Warm</b>	Acknowledge feelings briefly, then explore.
<b>Casual</b>	Everyday language, skip jargon.
<b>Professional</b>	Clear, efficient, actionable insights.

## 6. RAG System Deep Dive

### Hybrid Search Pipeline

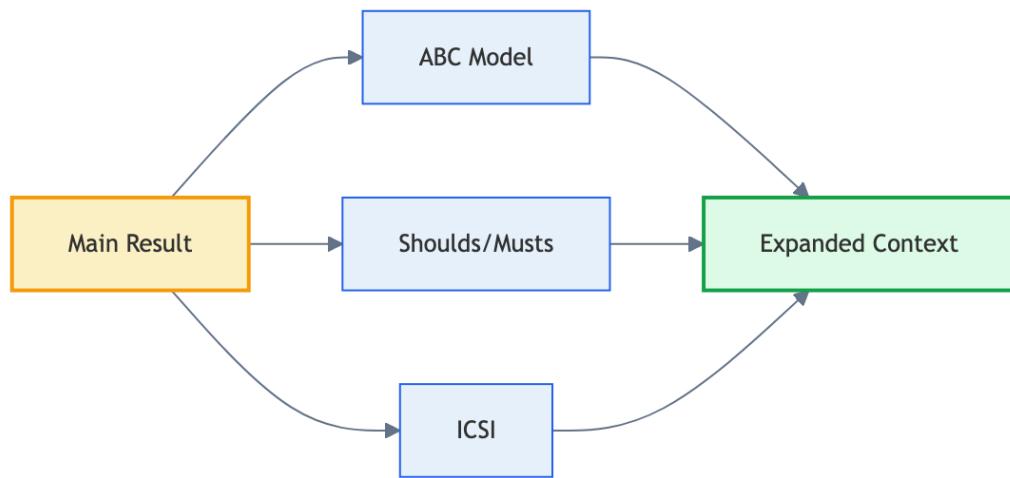

### Algorithm Steps

Step	Process	Details
1	Embed Query	OpenAI text-embedding-3-small → 1536 dimensions
2a	Semantic Search	Cosine similarity between query and chunk embeddings
2b	Keyword Search	TF-IDF with emotion boosting and word expansion
3	Merge Scores	$\text{hybrid} = (\text{semantic} \times 0.7) + (\text{keyword} \times 0.3)$
4	Emotion Boost	+20% if chunk's emotion type matches detected emotion
5	Return Top K	Default: 5 chunks

### Keyword Search Features

Feature	Description
Stopwords Filter	Removes "the", "a", "an", etc.
Emotion Boosting	Anger/anxiety/depression terms get 2x weight
Word Expansion	"angry" also matches "anger", "angered"
Synonym Matching	"sad" matches "depressed", "unhappy"

## Graph Expansion (Optional)

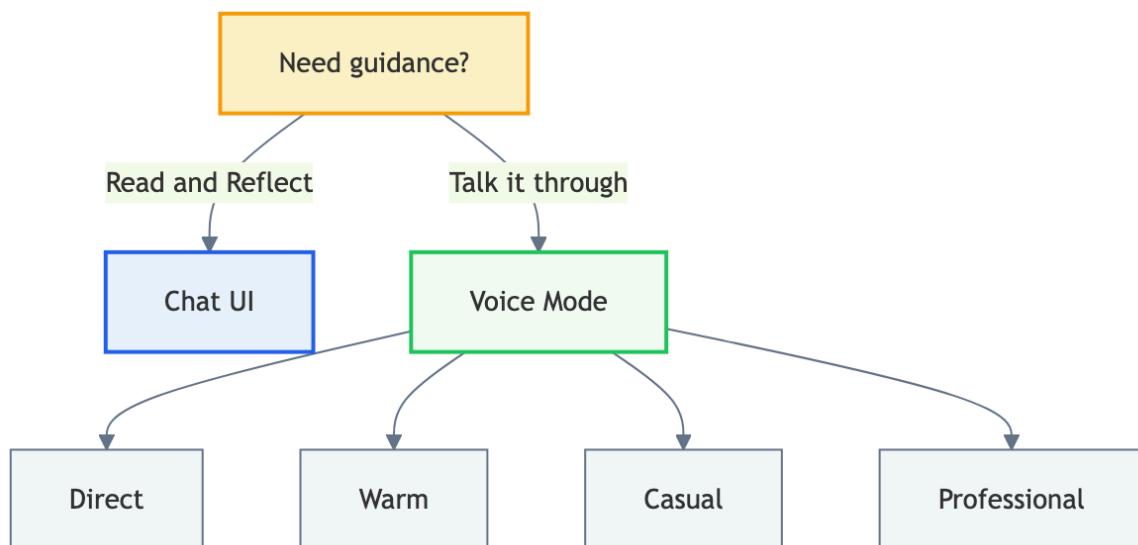

When enabled, the system follows "related" links between chunks to provide broader context and more connections between concepts.

## 7. Comparison

### Chat vs Voice

Feature	Chat	Voice
UI	Claude, Gemini, V0	WebRTC orb
Input	Text	Speech (Whisper-1)
Output	Streaming text	Speech + transcript
Model	gpt-4o-mini	gpt-4o-realtime-preview
RAG	280 chunks	280 chunks
Prompt	Full book knowledge	Condensed for voice
Styles	Fixed	4 options
Voices	—	9 options
Latency	Streaming	Realtime (lower)
Best For	Reading, reflection	Hands-free

### When to Use What

---

**My4Blocks** — Emotional Education Through AI

*Based on "You Only Have Four Problems" by Dr. Vincent E. Parr, Ph.D.*
